

Imagine Software delivers real-time portfolio, risk management and regulatory solutions. All from one integrated platform.

It's rare to find a company with such a long history that continues to innovate at the pace of Imagine Software.

I'm continually impressed with the speed at which Imagine is able to add coverage and capabilities, as well as its flexibility in creating new solutions that make it easy to slice and dice data so my team can quickly see the possibilities across all of our holdings and make more informed decisions.

DAVID ELMS
HEAD OF ALTERNATIVES
HENDERSON GLOBAL INVESTORS | UK

*Imagine was able to provide a customized, **all-in-one solution to simultaneously track regulatory limits and investment risk** – which is crucial in alerting us to potential breaches of guidelines and supports our ability to perform institutional-grade due diligence.*

ERIC KONIGSBERG
DIRECTOR OF RISK MANAGEMENT | LARCH LANE | USA

***Imagine's highly flexible and extensible risk management system is years ahead of what is offered by most local vendors.** This ability to scale is an essential element for us, along with Imagine's capacity to support risk analysis and valuations encompassing the global derivatives market.*

KONG WEI CHENG
VICE GENERAL MANAGER OF RISK DEPARTMENT | GF SECURITIES | CHINA

For asset managers who do not have a traditional risk management background, or even for those that do, Imagine can help to efficiently monitor and assess risks, such as breaches in real-time, and easily evaluate exposures, conduct stress testing, and measure VaR. **These are essential capabilities for firms looking to build investor confidence.**

CHUDE CHIDI-OFONG
CHIEF OPERATING OFFICER
LEDBURY CAPITAL PARTNERS LLP
UK

SkyBridge became the first customer to sign up for Imagine's new Risk Aggregator product. Given that risk management is so critical to our business, we evaluated the product and several alternatives very closely. **It quickly became apparent that Imagine's aggregation offering was the most sophisticated and flexible solution on the market.**

TATIANA SEGAL
CHIEF RISK OFFICER | SKYBRIDGE CAPITAL | USA

We performed our due diligence and researched other options but quickly realized that our old friends at Imagine were still providing the best solution to meet our needs. All these years later, **I still trust them to look after us and help us manage our portfolios and minimize risk with their system and services.**

HENRY KENNER
CEO | ARROWGRASS CAPITAL PARTNERS | UK

Imagine can easily aggregate extremely complex positions, capture risk, and manage equity derivatives, allowing us to successfully generate the returns expected by our Wealth Defender investors.

DAN BOSSCHER
PORTFOLIO MANAGER AT
PERENNIAL VALUE, AUSTRALIA

We are delighted with the integration of Imagine as our primary risk system and Trading Screen as our major Order Management System. **We needed to ensure seamless connectivity,** and the Imagine and Trading Screen teams successfully launched full STP.

ELAINE DAVIS
CHIEF OPERATING OFFICER
NINE MASTS | HONG KONG

Among a long list of benefits, Imagine was **the only third-party system we reviewed that delivered the analytics needed to calculate the real-time risk on cleared arbitrage trades.** Their solution enhances our robust processes and offers a new level of 'future-proofing' that will help us stay ahead as the clearing space evolves.

STEVE MARTIN
CHIEF OPERATING OFFICER | G. H. FINANCIALS | UK

Imagine Software provides real-time portfolio, risk management and regulatory solutions for the world's leading banks, broker dealers, hedge funds, pension funds, funds of funds and asset managers.
